

He usually sees accidents. The voice tells him before. Children mostly tumble and fall to the ground in his presence. The abuses which he hears are mostly regarding sexes.

Forgetfulness is very common in him. He is usually constipated. Gets usually disturbed when he does worship. He has met renowned sages of India but none could help him. They are unanimous in their opinion that it is Godly and the sound is "Anhad" (Godly) sound. At times his eyes are watery.

The physician who is treating him now for the last 1½ years is sure of his success ; but if any Homœo-physician has got interest he may correspond with the writer. There is no special thing or time for aggravation but much noise, bitter and hot things aggravate it and cold and cool relieve it to some extent.

I greet my fellow-Homœo-physicians on the New-Year's Day, 1952 and pray for the success of the Homœopathy in Medical India.

---

### A CLINICAL CASE

DR. NALINI KANTA MAZUMDER, B.A., M.D. (HOMŒO.),  
Ranaghat.

An youngman aged 18 years, was drenched in the rain one afternoon in Nov., 1948, and got pain and inflammation in his *Right Toe*, the next morning.

In spite of Allopathic treatment, the pain ascended to his *Right Knee* after a month. After 2 months, the pain shifted to the *Right and Left Shoulders* at a time. Then it attacked his Neck. After sometime, his Left Knee was affected.

Next, his Left Elbow, Right Elbow, and all big joints became affected.

This time, he changed his treatment, and placed himself under Homœopath.

There were inflammations, redness, and heat of the affected parts, and had relief from Heat.

The legs became emaciated and contracted, and he could not extend his legs and arms. He could not open his mouth also, and had to be fed with the help of Spoons. He could himself only sit up and hang his legs.

Last he says, he was given very high potencies of "Arsenic" which caused him extreme sufferings.

Being hopeless of recovery, he gave up treatment, and remained without treatment for about 1½ year.

He was brought to me by his aunt who is a neighbour of mine in Feb. 1950. I kept him under observation for a month, and gave him "Ginseng R.," 5 drops a dose internally twice a day, and "Fat of Tiger" as external application on the affected parts which were contracted and deformed also. It is needless to add that fomentation was applied after it morning and evening. I advised him also to sit up and try to extend his arms and legs.

On 25-4-50 he could walk limping with the help of a Club. His left leg was found to be quite well, but he complained of a pain inside his *Right Knee* which made him limp. I waited, and noticed that this pain inside the *Right Knee* aggravated during the *Dark Moon*. So I gave him a dose of Sulphur 30 and waited. The pain shifted to the ankle joint below, and he could walk better.

Next time, a slight aggravation of pain was marked during the *Dark Moon*, and I gave him the 200th potency, and thence forward he is walking without the help of any club. It should be mentioned that a dose of 1000 after a fortnight in the meantime, made him give up limping.

His *Right toe* is yet deformed though it has become flexible, and I have advised him to take *Ginseng Q* again 10 drops daily for some time, and take a stroll on the roads every morning and evening for an hour daily. He is doing that, and I hope to see him resume normal work soon.
