CASE OF THE MONTH FROM ONE OF OUR HOMŒOPATHIC HOSPITALS.

When reading these notes it must always be remembered that Homœopathy is essentially an individualistic treatment. It therefore never makes use of nor seeks for specifics for disease. So it must not be thought that any remedy mentioned in these notes will necessarily be the remedy for other cases of the same illness.

• THE REMEDY DEPENDS UPON THE INDIVIDUAL PATIENT'S REACTIONS AND NOT ON THE NAME OF THE DISEASE.

THE REMEDY was SPIGELIA 30. The disease
• AURICULAR FIBRILLATION.

• An ex-Mason, age 65.

• Well built. Poor colour with underlying blue tint. Looks tired. For 6 months has had attacks of palpitation with a lot of "fluttering" sensation over the heart. Attacks are increasing in frequency and now come on at any time day or night. Come on suddenly and work off gradually. Attacks have no relation to exertion nor emotion. Often has shooting pain over heart area after the attack stops.

• Sometimes he is wakened by attack. He changes his position for relief by lying on his back or he turns on his right side. He never lies on his left side as this brings on a choking sensation.
